OBJECTIVE

Motivated Electronics and Communication Engineering undergraduate with interests in Artificial Intelligence, IoT, Embedded Systems, Wireless Communication, Signal Processing, and Web Development. Experienced in developing academic and practical projects using Python, Java, Flask, JavaScript, databases, and microcontrollers. Seeking opportunities to apply engineering knowledge, problem-solving skills, and project experience to real-world technology solutions.

EDUCATION

Institute of Aeronautical Engineering Bachelor of Technology in Electronics and Communication Engineering CGPA: 8.5/10.0	2024 – 2028
Intermediate Education Intermediate / 12th Standard Percentage: 96%	2022 – 2024
Sri Chaitanya High School SSC / 10th Standard GPA: 9.7/10.0	2021 – 2022

EXPERIENCE

Apollo Hospitals, Hyderabad Field Project / Internship - Completed a field project titled “<i>Predictive Maintenance for Central HVAC & Air Handling Units (AHUs)</i>”. - Gained practical exposure to hospital infrastructure operations, HVAC and AHU monitoring practices, preventive maintenance processes, and predictive maintenance concepts. - Successfully completed the assigned internship/project work for a total duration of 32 days.	May – June 2026
Styrax Life Sciences Pvt. Ltd., Hyderabad Field Project Work - Successfully completed field project work at Styrax Life Sciences Pvt. Ltd., Research & Development Division, Hyderabad. - Completed the field project work from 05 May 2025 to 24 May 2025. - Gained practical exposure to a professional Research & Development environment.	May 2025

TECHNICAL SKILLS

Programming Languages: Python, Java, C
Web Technologies: HTML, CSS, JavaScript
Frameworks / Libraries: Flask, Chart.js
Databases: MySQL, SQLite
Embedded Systems: Arduino, ESP32, ESP8266 / NodeMCU
Engineering Tools: MATLAB, Vivado, NI LabVIEW, Multisim, HFSS
Development Tools: VS Code, Eclipse, Git, GitHub
Deployment: Render

PROJECTS

AI-Based Wi-Fi Signal Mapping and Intelligent Router Placement Using RSSI Analysis <i>Python, Flask, SQLite, JavaScript, Chart.js, ESP8266</i> - Developed a Wi-Fi signal monitoring system that collects RSSI and signal-quality information from Wi-Fi networks. - Built a Flask-based dashboard displaying SSID, RSSI, signal strength, Wi-Fi band, channel, measurement history, and signal mapping. - Implemented intelligent router-placement recommendations based on collected Wi-Fi signal measurements. - Deployed the application using Render and maintained the project using GitHub. Live Dashboard GitHub Repository

Student Performance Prediction System

Java, Java Swing, JDBC, MySQL

- Developed a Java-based application for predicting student academic performance.
- Designed a Java Swing interface for entering student and academic information.
- Integrated JDBC with MySQL for storing and retrieving student data.
- Implemented a prediction module to process academic information and display performance results.

Smart Nutrition Analyzer

HTML, CSS, JavaScript

- Developed a web-based nutrition analysis dashboard for calculating nutritional values based on selected food items and quantities.
- Included food categories such as vegetables, rice, pulses, and meat.
- Designed features for daily calorie tracking, calorie limits, and nutrition history.

AI-Based Smart Battery Health Monitoring System

HTML, CSS, JavaScript, Python, MySQL

- Developed an AI-based battery health monitoring system with a web dashboard for monitoring battery parameters and health status.
- Used Python for data processing and AI-based analysis, with MySQL for storing battery monitoring data.
- Designed an interactive dashboard using HTML, CSS, and JavaScript to display battery information and analysis results.

Student Management System

HTML

- Developed a web-based Student Management System for managing student information through an easy-to-use interface.
- Designed web pages using HTML for adding, viewing, updating, and managing student records.
- Created a simple interface for efficient student information management.

CERTIFICATIONS

- **Cyber Security Pledge Certificate** – Information Security Education and Awareness (ISEA), Ministry of Electronics & Information Technology, Government of India. Issued: 22 October 2025.

ACHIEVEMENTS

- Successfully completed field project work at Styrax Life Sciences Pvt. Ltd., Research & Development Division.
- Successfully completed a 32-day field project/internship at Apollo Hospitals, Hyderabad.
- Developed and deployed an AI-based Wi-Fi Signal Mapping web application with a public dashboard.
- Built multiple academic projects involving Java, Python, Flask, JavaScript, MySQL, SQLite, Arduino, and ESP8266.

INTERESTS

Artificial Intelligence & Machine Learning, IoT, Embedded Systems, Wireless Communication, Signal Processing, Web Development
